Subject: Williams Olefins - Geismar

Sam,

A quick pull of the Williams Olefins Compliance History in Echo indicates:

- 2 formal enforcement actions by LDEQ in the last 5 years with total penalties of \$4500
- Last CAA inspection was conducted 12/19/2011

We understand that Williams Olefins was also in the midst of an expansion effort to increase ethylene production by 600 million pounds by the end of 2013.

EPA Region 6 referred an LDAR case to DOJ in 2009. No significant action on this case to date.
